The definition of counseling is the skilled and principled use of a relationship to facilitate adjustment to changing life circumstances; promote personal growth, needs attainment, and the optimal development of personal resources. The aim is to provide an opportunity to work towards using positive resources to promote overall wellness. Counseling relationships will vary according to need, but may be concerned with: developmental issues, addressing and resolving specific problems, making decisions, coping with crisis, developing personal insights and knowledge, working through feelings of inner conflict or improving relationships with others.

The counselor's role is to facilitate the clients work in ways that respect the client's values and personal resources.
